# Rides, Walks & Drives around Grong Grong

**Welcome to Grong Grong. We hope you have a peaceful and happy stay.**

These maps provide walks and bike rides for Grong Grong. By car from Grong Grong you can easily explore the busy and interesting centres of Ganmain, Coolamon & Junee to the east, Barellan & Ardlethan to the north. And Narrandera, Leeton & Griffith to the west.

In late winter and early spring you will see new lambs, often in large 'creche' groups while mums feed. The crops are green and thick, and the canola is flowering. Wattle is abundant, willy wagtails are busy building nests and new magpies and kookaburras are having flying lessons.

During the months of November and December harvest is in full swing as farmers work around the clock to bring wheat, oats, barley, chickpeas and canola safely into the silos; your morning oats or toast or your evening beer and hummus may well have started in Grong Grong!!

Following Christmas everyone takes a break, often taking to the waters of the Murrumbidgee for fishing, swimming and boating. Keep a sharp eye out for blue tongue and frill neck lizards, and huge goannas as they bake in the sun – often on the bitumen.

As soon as the cool rains of autumn arrive it's planting time again, and the southern night skies light up in the clean air over Grong Grong.

Frosty days often roll into clear, cold days through the winter months. Many of the eucalypts bloom and birds of prey sit high on wires, on the watch for an easy lunch.
